

GVC Americas Announces Sale of SxanPro to Vizient

Transaction Represents Successful Exit of Healthcare Technology Investment

GRAND RAPIDS, Mich., September 17, 2026 - GVC Americas ("GVCA") today announced the sale of its portfolio company, SxanPro, to Vizient®, the nation's largest provider-driven healthcare solutions company. The transaction closed on September 17, 2026.

Founded and led by CEO Ashlea Souffrou, SxanPro is a healthcare inventory technology platform that helps health systems reduce costs and improve operational efficiency. The company uses patented mobile technology and proprietary data analytics to help healthcare providers identify and prevent waste associated with expired products, overordering, and inefficient manual inventory processes. Its integration-free platform leverages FDA-mandated Unique Device Identifier ("UDI") data to provide healthcare organizations with greater visibility into procedural inventory.

GVCA initially invested in SxanPro in March 2023, providing growth capital to support the company's continued expansion. At the time of investment, GVCA identified SxanPro's differentiated technology, compelling healthcare cost-savings proposition, experienced leadership team, and strategic relevance to the broader healthcare supply chain ecosystem as key components of its investment thesis.

"SxanPro is a great example of what we seek to accomplish in partnership with founder-led businesses. Ashlea and her team built a differentiated solution addressing a meaningful challenge for health systems - reducing waste while creating greater visibility and efficiency across the healthcare supply chain. We are proud to have supported SxanPro's growth and believe Vizient is an exceptional strategic home for the company's next chapter."

- Lauren Palazzolo, Partner, GVC Americas

The acquisition brings SxanPro's procedural inventory intelligence and UDI-based technology into Vizient's broader Spend Management platform, significantly expanding the reach and potential impact of SxanPro's solutions. As the nation's largest provider-driven healthcare performance improvement company, Vizient serves more than two-thirds of U.S. acute care providers and more than one-third of ambulatory providers. Through its proprietary data and analytics, Vizient delivers clinical and operational insights while managing a contract portfolio representing approximately \$168 billion in annual purchasing volume.

"GVCA has been an incredible partner to SxanPro and to me personally. Their team understood our vision and provided the support and resources to help us scale while allowing us to remain focused on solving critical challenges for our health system customers. Joining Vizient creates an exciting opportunity to bring our technology and capabilities to an even broader healthcare audience."

- Ashlea Souffrou, Founder and CEO, SxanPro
